Hi Steve,

The file you are looking for is entitled "April2012_AEOsSummary.xlsx", and it was uploaded into our L:\ drive that the rest of the files are located in. I just checked, and it is there.

Additionally, I received an email from Brian asking for the raw data for alkylphenols and acrylamide. Those files are also in the L:\ drive in two separate folders. My directory states the folder as: L:\Priv\NRP_RD\316-258_501(2) Research Data\Organic.

In that folder, there are three subfolders, 1 for acrylamide, alkylphenols, and ethoxylates. Each of those contains raw data, run logs, etc. Please check and let me know if you cannot access it or are still missing something.

Thanks

Patrick

Subject: Re: Pavillion (TO78) more Las Vegas data package email 4 of 4

Also, wrt C15 EOx (Ethoxylated Alcohol C15), they provided two spreadsheets that show the final values for samples analyzed on 5/10 and 5/14. But I don't have similar spreadsheets for these samples (below). I see that values are provided in the report for all these samples but the spreadsheets show the conversion that is required, to account for the surrogate recovery and it also had a good summary of spike results

These samples would have been analyzed on 4/25-26 and 4/30:

PGDW05-0412
PGDW20-0412
PGDW20d-0412
PGDW23-0412
EPAMW02-0412-1
PGDW30-0412
Field and Equipment Blanks 1 & 2

Steve,

I have looked through all the files from you that included the Las Vegas data. They include everything for the Ethoxylated compounds, and also the preparation information for the alkyl phenols and acrylamide. But I don't see any analytical data for alkyl phenols and acrylamide. Sorry, but until I went through these in detail I didn't know what I had. This review is for all the files sent in the four emails.

I can write up my report on C15 EOx (Ethoxylated Alcohol C15) but need the analytical data for the other two analyses.

Please advise.

Thank you,

Dave
